

SC

2010 LEXUS

A photograph of a modern building with a curved, metallic facade. The building's surface is composed of large, rectangular panels that reflect light, creating a shimmering effect. The building curves away from the viewer, creating a sense of depth. In the foreground, a white car is partially visible on the right side, showing its headlight and front bumper. The ground is a light-colored, paved surface. The overall scene is brightly lit, suggesting a sunny day.

IT OFFERS THE DRIVER
EVERYTHING BUT
THE ABILITY TO RESIST.

THE 2010 SC

From the moment inspiration for the SC hit on the beaches of the French Riviera, we knew that it was destined to be far more than mere transportation. A sleek, hardtop coupe on one hand. An exhilarating convertible on the other. And now, with an array of state-of-the-art innovations—well, giving in isn't just understandable. It's inevitable.

TRANSPORTATION THAT
TRANSCENDS.

SAFETY

SPECS

The beaches of the Côte d'Azur by day and five-star hotels by night. Sound like a dream vacation? Try a typical workday. For weeks, our designers immersed themselves in the lifestyle of the South of France, recording their observations and finding inspiration for what would later become the SC.

CONTRARY TO POPULAR BELIEF,
THERE ARE TIMES ON THE CÔTE D'AZUR
WHEN YOU WANT TO COVER UP.

Known for its fun-in-the-sun lifestyle, the South of France is hardly a beacon of modesty. Except in this case: When it comes to flaunting the technological gadgetry in French yachts, not everything must be seen to be appreciated. Inspired partly by the stunning, uninterrupted swathes of woodwork found in these vessels, the wood trim in the SC is virtually seamless throughout the cabin. And so as not to spoil this design, two separate wood-trimmed panels were crafted to conceal the audio controls and Navigation System¹ when they're not in use.

STYLE

PERFORMANCE

INNOVATION

SAFETY

SPECS

The finest design begins with the finest materials. In the case of the SC, you'll find the seating, center console and door panels trimmed in exquisite semi-aniline leather. As the result of its stringent selection process (less than 10 percent of hides are deemed worthy) and minimal treatment, semi-aniline leather feels softer and more natural than leather found in many other luxury vehicles. For added visual appeal, the steering wheel, shift knob and panels are outfitted with brown walnut or espresso bird's-eye maple trim that is hand-chosen to ensure the color and grain is uniform throughout the cabin.

RAISED COCKPIT COWLING

WINDSHIELD ANGLE

WIND DEFLECTOR

AS APPEALING TO THE WIND AS IT IS TO THE EYE.

Driving in the open air: It's the greatest benefit of owning a convertible. And, far too often, the greatest pitfall. After all, the wind that gently blows through your hair one second can just as easily tangle it the next. Except in this case. The SC was meticulously designed to manage airflow over, under, around and through every inch of it. As a result, you can converse at normal speaking levels even when the top is down. And, when the top is up, it's as quiet as a fixed-roof coupe.

SPECS

IT'S BEEN SAID THAT
PERFORMANCE IS AN ART FORM.
HERE'S PROOF.

If the ultimate measure of a piece of art is the emotion it evokes, you could almost argue the SC is better-suited for an exhibition than an expressway. Almost. Powered by a commanding V8 engine that uses Variable Valve Timing with intelligence (VVT-i) to squeeze every drop of power out at a moment's notice, the SC is as exhilarating to drive as it is to behold.

HANDLING

See disclaimers on page 52.

REFINED? YES. TIMID? NO.

Under normal circumstances, the SC is a vehicle that's meant to be savored. But for those moments when time is of the essence or if your adrenals just need a kick start, it's more than ready to deliver. Under its hood, a 288-horsepower² V8 is paired with a six-speed automatic transmission for virtually seamless shifting. And for drivers craving even more control, a sequential-shift function allows you to manually change gears by nudging the gearshift forward or back. All the while, hills and headwinds are at its mercy (and therefore, yours), courtesy of an Electronically Controlled Transmission with intelligence (ECT-i) that compensates for both.

See disclaimers on page 52.

As if it needed any more ways to turn heads, the SC features a host of advanced handling technologies. Like Vehicle Stability Control (VSC)³ that can sense and help adjust to a wheel's loss of traction while cornering. As well as a front and rear double-wishbone suspension fitted with gas-pressurized shock absorbers. And, to help prevent body sway when pushed to its limits, stabilizer bars help the SC remain flat in curves.

NUMEROUS INNOVATIONS TO TALK ABOUT INCLUDING ONE THAT LISTENS.

Between its effortless retractable hardtop and indulgent interior amenities, the SC features plenty of ways to spoil the driver. Now it features a way to understand them as well: a voice-recognition system that is the most advanced in its class, enabling you to control everything from the audio to available real-time traffic and weather reports.

IN A CONVERTIBLE, PREDICTING THE WEATHER ISN'T JUST IMPRESSIVE. IT'S IMPERATIVE.

Nothing spoils a blissful afternoon drive with the top down quite like an unexpected rainstorm. Fortunately, the SC offers two new ways to help you prepare for the unexpected. Available XM NAVWeather™^{1,4} continually updates you with weather information along your route and alerts you when severe weather is approaching (at 64 and 16 miles out). And, to help you navigate around congestion, available XM NAVTraffic®^{1,4} offers real-time traffic, road construction and accident information and can automatically re-route you to help you arrive at your destination faster.

The available XM NavWeather™^{1,4} can give real-time weather reports for specific cities and even alert you twice, when you are within 64 miles and 16 miles of severe weather.

AN INCOMPARABLE DRIVE DESERVES AN INCOMPARABLE SOUNDTRACK.

Typically, convertibles leave much to be desired by way of audio systems. To address this, Lexus engineers collaborated with Mark Levinson^{®5} engineers, highly regarded in audiophile circles for their six-figure home systems, early in the development of the SC. A special amplifier was created that offers distortion levels 10 times better than the industry standard. The rear seats were sculpted to enhance bass performance. And the trunk was reconfigured to provide optimal placement of the speakers. The end result of these measures: an available nine-speaker, Mark Levinson Premium Audio System⁵ that delivers sound quality nearly unheard of in a vehicle, much less a convertible.

STYLE

PERFORMANCE

INNOVATION

SAFETY

SPECS

IT CAN'T CONTROL HOW MUCH
THE TEMPERATURE OUTSIDE VARIES.

ONLY HOW MUCH YOU'LL NOTICE.

In a convertible, 70 degrees at night on a highway feels quite a bit different than 70 degrees parked in the beating sun. So, to compensate for the inevitable variations of temperature that come with having a retractable top, the SC features an Intuitive Climate-Control system. Using sensors to determine how much sun is penetrating into the cabin, whether the top is up or down and your current driving speed, it can activate lap-level vents to provide cool or warm air whenever and wherever you need it most.

STYLE

PERFORMANCE

INNOVATION

SAFETY

SPECS

THE ONE ASPECT OF ITS DESIGN
WE HOPE YOU NEVER SEE.

Some things are better not left to chance. So, in addition to the more conventional safety measures like front and rear crumple zones found on the SC, we developed a unique steel-reinforced chassis and placed special high-strength bracing throughout. As a result, this helps its body remain rigid whether the top is up or down—which can help enhance cornering—as well as help provide additional side-impact protection. And just for good measure, two separate steel beams were added to the doors for additional side-impact protection.

STYLE

PERFORMANCE

INNOVATION

SAFETY

SPECS

SAFETY

VISIBILITY

PASSIVE

While the jeweled-cluster headlamps on the SC are attractive in their own right, they actually serve a purpose. To help illuminate more of the road through turns, the Adaptive Front Lighting System (AFS) can pivot the left headlamp up to 15 degrees and the right headlamp up to 5 degrees into a curve. And to help reduce glare to oncoming traffic, dynamic auto-leveling High-Intensity Discharge (HID) headlamps automatically sense and adjust to changes in load and road conditions.

BEFORE WE EVER CONSIDERED
HOW YOU'D LOOK IN IT, WE
CONSIDERED HOW YOU'D SEE.

STYLE

See disclaimers on page 52.

JUST ONE MORE WAY WE'VE SURROUNDED YOU WITH AIR.

In addition to the air that surrounds you outside of the cabin, the SC features six airbags⁶ inside. The driver's front airbag⁶ is designed to deploy according to the severity of impact and how far forward the seat is on the seat track. And, mounted under the dash, knee airbags⁶ help provide protection to the driver and front passenger. Finally, side impact airbags⁶ located within the front seats themselves help to ensure they're in a consistent position relative to you and your front passenger, regardless of how far forward or back your seats are.

WARRANTY

Four-year/50,000-mile Lexus Limited Warranty. Six-year/70,000-mile Powertrain Warranty. Six-year/unlimited-mileage Corrosion Perforation Warranty. All warranties with zero deductible. See the *SC Warranty and Services Guide* at your Lexus dealer for details.

1. The Navigation System is designed to assist in locating an address or point of interest. XM Radio,[®] XM NavTraffic[®] and XM NavWeather[™] services require a monthly service fee and a no-cost, optional dealer-installed external antenna. XM NavTraffic is designed to provide real-time traffic or alternative routes of travel. XM NavWeather is designed to provide real-time weather and forecasting information in your general vicinity and along your route of travel. Discrepancies may be encountered between the system and your actual location. Road system and weather changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available in every city or roadway. Periodic Navigation updates available at an additional cost. Please see your *Navigation System Owner's Manual* for further details. **2.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. If premium fuel is not used, performance will decrease. **3.** Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **4.** XM NavTraffic[®] and XM NavWeather[™] each require a separate XM[®] subscription. After a 90-day complimentary trial, you must set up the appropriate XM subscription(s) to continue receiving these services. The XM NavTraffic and XM NavWeather are available in the 48 contiguous United States and D.C. For details about the XM service coverage areas, visit www.xmradio.com or call the XM Listener Care Center at 1-877-515-3987. To receive XM NavTraffic and XM NavWeather services, XM service must be activated. To activate the service, call the XM Listener Care Center. Subscriptions are governed by the XM Customer Agreement available at xmradio.com/serviceterms. XM Radio fees, services and programming are subject to change. **5.** Mark Levinson[®] is a registered trademark of Harman International Industries, Inc. **6.** All the airbag (AB) systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts, sit upright in the middle of the seat as far back as possible and do not lean against the door. Do not put objects in front of an AB or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. The force of an inflating AB may cause serious injury or death. Please see your *Owner's Manual* for further information/warnings. **7.** Run-flat tire technology is designed for limited emergency use only. If air pressure is lost, vehicle speed must remain below 55 mph; cornering, braking and accelerating must be done with extreme caution; and the tire should be replaced within 100 miles. Temporary spare is not provided with the run-flat tire option. Please see your Lexus dealer for details. **8.** 18-in performance tires are expected to experience greater tire wear than conventional tires. Tire life may substantially be less than 15,000 miles, depending upon driving conditions. **9.** Performance figures are for comparison only and were obtained with prototype vehicles by professional drivers using special safety equipment and procedures. Do not attempt. **10.** EPA-estimated ratings. Actual mileage will vary. **11.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking

effectiveness also depends on proper brake-system maintenance and tire and road conditions. **12.** The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key matches the code in the vehicle's immobilizer. Because the transponder chip is embedded in the key, it can be costly to replace. If you lose a key, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local *Yellow Pages* or by contacting www.aloa.org. **13.** The Lexus Personalized Settings (LPS) Program is a one-time, complimentary offer for the first 12 months from the date the vehicle is sold. Please see your Lexus dealer for more information. **14.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Cold weather will limit effectiveness and view may become cloudy. **15.** *Bluetooth*[®] technology phones listed on lexus.com have been tested for compatibility with Lexus vehicles. Performance will vary based on phone software version, coverage and your wireless carrier. Phones are warranted by their manufacturer, not Lexus. **16.** Continuous average power, all channels driven, at less than 0.01% THD; 20-20,000 Hz. **17.** The Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. Please see your *Owner's Manual* for details. **18.** Currently available PPO. Ask your Dealer Sales Consultant for vehicle application.

*Lexus strives to build vehicles to match customer interest, and thus they typically are built with popular options and option packages. Not all options/packages are available separately, and some may not be available in all regions of the country. See lexus.com for information about options/packages commonly available in your area. If you would prefer a vehicle without any or with different options, contact your dealer to check for current availability or the possibility of placing a special order. Specifications, features, equipment, technical data, performance figures, options, and color and trim are based upon information available at time of printing, are subject to change without notice, are for mainland U.S.A. vehicles only. Some vehicles shown with available equipment. See your Lexus dealer for details. Lexus reminds you to wear seatbelts, secure children in rear seat, obey all traffic laws and drive responsibly. For more information, call 800-USA-LEXUS (872-5398) or visit lexus.com. To learn more about your financing options, contact your Lexus dealer or call Lexus Financial Services at 800-874-7050.
