

CORVETTE 2020

FOR ZORA ARKUS-DUNTOV

-

THE ORIGINAL CORVETTE CHIEF ENGINEER  
WHO LIT AND NURTURED THE MID-ENGINE FLAME.

CORVETTE 

—

## A DESTINY FULFILLED.

This is the moment we've been waiting for. The all-new mid-engine 2020 Corvette Stingray is here. When reinventing this iconic automobile, the creators broke barriers with a Corvette so advanced that the world of sports cars may never be the same. It is nothing less than the democratization of the supercar.

In naming the Stingray the 2020 *MotorTrend* Car of the Year,<sup>™</sup> the editors have declared: "The mid-engine Corvette is a game changer, an inflection point and a reminder that when Americans truly set our minds to a task, look out."

**MOTORTREND**  
CAR OF THE YEAR 2020<sup>®</sup>  
NORTH AMERICA

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

BENEFITS OF MID-ENGINE

—  
THE MOVE

TO THE MIDDLE.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

Why mid-engine? First, this puts the weight of the engine over the rear-driving wheels to enhance traction. With the engine located behind the cockpit, there's more forward visibility. And with the seats positioned closer to the front wheels, the driver and passenger are located at the car's center of gravity.

The result is instant response, a feeling that the car is rotating around you. With the extra traction on the rear wheels and nothing but the road ahead, you can dive quickly into a corner under braking and accelerate out smoothly. The Stingray is born to make your confidence soar.

DESIGN

—  
**NOT JUST A NEW CHAPTER.**

**IT'S A WHOLE NEW BOOK.**

The mid-engine architecture dictated an all-new shape for Stingray with a polite nod to its proud heritage. Sweeping new proportions and a wide stance dominate your view. Function plays a huge role, with large front intakes and sculpted side intakes that help the engine breathe and stay cool. With the cockpit moved significantly forward, the side profile reveals a lower cowl with a long, graceful rear deck. The rear fascia features two functional air exits flanked by twin taillamps and twin exhaust outlets on each side, leaving no doubt about what you're driving.

—  
**TAKING THE ART  
OF DRIVING  
TO A NEW LEVEL.**

**3LT INTERIOR WITH OPTIONS | JET BLACK WITH  
AVAILABLE ADRENALINE RED CUSTOM STITCHING**

There's never been a Corvette cockpit this well-suited to enthusiast driving. Your driving position is some 16 inches forward compared to the previous generation, which puts you firmly in control. The low front cowl makes it even easier to see, while a racing-style steering wheel with paddle shifters keeps the view pure and also provides extra knee room.

Your rear sight lines are equally as impressive, thanks to an available Rear Camera Mirror.<sup>1</sup> Console controls include a push-button toggle switch gear selector and a leather-wrapped Driver Mode Selector. Finally, a flowing buttress is topped with easy-to-reach climate controls.

<sup>1</sup> Read the vehicle Owner's Manual for important feature limitations and information.

---

## THE COUPE.

## THE CONVERTIBLE.

When you first encounter a Stingray coupe, your eye is drawn to the powerful 6.2L V8 engine under glass. The coupe features a lightweight, easily removable roof panel that stows conveniently in the rear trunk. Choose from a standard body-color roof panel or available transparent or carbon-fiber versions.

For the first time ever, Corvette convertible features a production retractable hardtop that automatically folds neatly over the engine compartment in 16 seconds and can be operated at speeds up to 30 mph.

This hardtop retains the coupe's aerodynamic form and produces a similar drag coefficient with the top up. In the lowered position, the top does not intrude on trunk space. Track enthusiasts will be pleased to know that the new convertible with the top up meets the same standards as the coupe.

DESIGN

The Stingray was shaped and sculpted to consume massive amounts of air. A large air inlet dominates the side profile, providing vital breathing and cooling to the engine. The door releases are neatly hidden inside the inlet. The front sports large outboard air inlets that feed twin radiators just ahead of the front wheels.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

ARCHITECTURE

WEIGHT DISTRIBUTION

## GREATNESS

## REARRANGED.

For most of automotive history, engineers have sought a 50:50 weight distribution, especially for front-engine cars with rear-driving wheels. But Zora Arkus-Duntov declared a 40:60 front-to-rear weight ratio as ideal when he was developing the first Chevrolet mid-engine concept car – CERV I (Chevrolet Experimental Research Vehicle).

The all-new Stingray uses the same 40:60 front-to-rear weight ratio. Equally important, however, is the extraordinary rigidity of the structure itself, thanks to its architecture and materials. The Stingray structure is actually 54% stiffer than a Ferrari 458 Spider and 29% stiffer than a McLaren MP4-12C.

The secret is a closed center tunnel backbone conjoined by twin rails top and bottom. Many of the aluminum pieces are made with high-pressure die castings for extraordinary material properties, while others are made out of cast, forged or extruded aluminum. There is even a carbon-fiber rear bumper beam.

This rigid structure not only allows the all-new Stingray to change direction in heroic ways, but it also quickens acceleration times.

SUSPENSION

—

**THE CREDENTIALS  
TO CONQUER  
ANY CORNER.**

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

**A TOTALLY NEW SUSPENSION GEOMETRY.**

—

Lightning reflexes were mandatory. The eighth-generation Corvette features a modified SLA (short/long arm) suspension geometry as well as coil springs on all four corners of the car. This configuration keeps spring rates and damping low for comfort while enabling high-g cornering capability.

You can choose between the standard FE1 suspension or the available Z51 Performance Package. A new generation of Magnetic Selective Ride Control™ is available on Z51-equipped cars. The system integrates with the Driver Mode Selector to adjust ride stiffness in real time using magnetized ferrous particles in the shock fluid.

**FRONT LIFT.**

—

A new available front lift system can raise the front end almost 2 inches to help clear steep driveways, parking ramps or speed bumps. It lifts in less than 3 seconds at speeds below 24 mph and can be lowered manually or automatically afterward. And since it remembers up to 1,000 GPS locations, it works seamlessly within your world.

ENGINE

—  
THE SOUL  
OF  
STINGRAY.

The heart of the all-new Stingray is a 6.2L LT2 aluminum small block V8 engine. Now in fifth-generation form, it is more compact yet more powerful: 490 standard horsepower and 465 lb.-ft. of torque. The available performance exhaust or the Z51 Performance Package add 5 more horsepower and 5 more lb.-ft. of torque, good for 0 to 60 mph in under 3 seconds<sup>1</sup>. Much of the LT2's additional power can be attributed to excellent breathing. The intake system is a low-restriction design and incorporates identical 210 mm runners and an 87 mm throttle body. The performance header exhaust manifolds are also low-restriction and feature a stylized four-into-one design.

An all-new standard dry-sump oil system is integrated into the block and allows the engine to be positioned for a lower center of gravity. Three scavenging pumps capture circulating oil to ensure pressurized distribution even in the highest-g situations on the track.

<sup>1</sup>Based on initial vehicle movement.

DUAL-CLUTCH TRANSMISSION

---

**LIGHTNING-FAST  
AND EFFICIENT  
SHIFTS.**

The control of a manual. The smoothness of an automatic. Yet it shifts faster than any human can, helping create the fastest-accelerating production Stingray ever. The new Corvette dual-clutch transmission is effectively two manual gearboxes that have clutches actuated by computers on a concentric shaft so there is no torque loss. There's a shaft for even gears 2-4-6-8-R and another for odd gears 1-3-5-7. The shifting schedule aligns to your chosen Driver Mode Selector position. As you shift via the paddles, you can simultaneously engage one shaft while you're disengaging another, giving you the ultimate feeling of control.

BRAKES

For the first time ever, Stingray uses an electro-hydraulic boost braking system. It adopts the proper pedal feel for each selected driving mode. It also helps reduce pad wear and brake pulsation.

Braking hardware includes Brembo® 4-piston front and rear calipers squeezing robust rotors. For the track, the available Z51 Performance Package includes monobloc 4-piston calipers for improved stiffness with larger rotors all around.

## TIRES

### MICHELIN® PILOT® SPORT ALL-SEASON TIRES

Great news for Corvette drivers who want standard summer tire performance with all-season capability. Michelin has created a custom Corvette application for its Pilot Sport all-season tire with the ability to achieve .94 g of lateral acceleration on a skid pad. If you crave even more capability, order the available Z51 Performance Package that includes standard Michelin Pilot Sport 4S summer-only tires<sup>1</sup> for even higher lateral grip on dry racetracks.

<sup>1</sup> Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. For important tire and wheel information, go to [my.chevrolet.com/learnAbout/chevroleettires](http://my.chevrolet.com/learnAbout/chevroleettires) or see your dealer.

PERFORMANCE

3LT CONVERTIBLE WITH Z51 PERFORMANCE PACKAGE AND  
OPTIONS | SEBRING ORANGE TINTCOAT (EXTRA COST)

Z MODE STEERING WHEEL BUTTON

---

## THE RIGHT MODE FOR ANY ROAD.

Driving styles are individual. We have our preferences when it comes to shift points, steering effort, engine sound and braking feel. Bad weather or freezing conditions can also affect our choices. Six driving modes are available on Stingray, including four standard presets – Tour, Weather, Sport and Track – plus two new flexible modes. These include MyMode, which allows you to

create your own combination of presets for everyday use, and Z Mode, which lets you choose from a larger menu of high-performance settings for the engine, transmission and steering. It's great for a particular road or track, and you can engage it by pressing the Z button on the steering wheel.

PERFORMANCE

# Z51

## PERFORMANCE PACKAGE.

GO ALL IN.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

The architecture, structure, suspension, calibrations and software of Stingray are all ready to deliver a driving experience beyond your imagination. But to reach the pinnacle, check the box for the available Z51 Performance Package. It provides a group of performance enhancements, including:

- Performance brakes with larger brake rotors and performance brake pads
- Performance suspension (FE3)
- Performance exhaust
- Performance final drive ratio
- Electronic Limited-Slip Differential
- Rear spoiler and front splitter
- Michelin® Pilot® Sport 4S summer-only tires<sup>1</sup>
- Heavy-duty cooling system

Z51 Performance Package cars can also be ordered with a newly engineered real-time Magnetic Selective Ride Control system that includes Performance Traction Management.

<sup>1</sup> Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. For important tire and wheel information, go to [my.chevrolet.com/learnAbout/chevrolettires](https://my.chevrolet.com/learnAbout/chevrolettires) or see your dealer.

—  
**DELIVERS WHAT  
YOU WANT,  
WHEN YOU WANT IT.**

3LT INTERIOR WITH OPTIONS | SKY COOL GRAY

Corvette engineers recognize that you have different information needs in different driving situations. A 12-inch diagonal customizable gauge cluster dominates the controls with graphics that change completely depending on your selected driving mode. You can view the wide cluster display neatly framed by the racing-style steering wheel. The display itself has two panels on each side of the tachometer that you can populate with specific information or gauges

using the Options menu. An 8-inch diagonal color touch-screen is conveniently positioned just right of the central cluster.

A push-button gear selector helps simplify the console area. The Driver Mode Selector features a leather-wrapped palm rest, while climate controls are now located atop the buttress separating driver and passenger.

AVAILABLE BOSE PERFORMANCE SERIES 14-SPEAKER SYSTEM

## BOUNDLESS TECHNOLOGY.

High performance takes on many dimensions in the new Stingray. Among them is the available 14-speaker Bose Performance Series, the most powerful sound system ever in a Stingray. Plus, an available 4G LTE Wi-Fi® Hotspot<sup>1</sup> allows you to stay connected, as does standard Apple CarPlay<sup>2</sup> and Android Auto<sup>3</sup> compatibility.

Help yourself become a better driver with the available Performance Data Recorder. When activated, it logs video of your drive onto an SD memory card. Three modes allow you to capture video, audio driving stats, date and time, and much more. A fourth, Valet Mode, can record the activity of your car when you're not around. On the Corvette website, you can also download software developed by the same engineering firm that supplies Corvette Racing. It acts like a virtual driving coach, giving you vital metrics and comparisons.

An available Head-Up Display (HUD) system offers three distinct views for Tour, Sport and Track modes. Tour mode includes speed limit and turn-by-turn navigation prompts. Sport mode includes digital speed, tachometer and a g-force indicator. Track mode includes digital speed, tachometer, shift lights, best lap time, current lap time and gain/loss.

WIRELESS CHARGING<sup>4</sup>

PERFORMANCE DATA RECORDER

<sup>1</sup> Service varies with conditions and location. Requires active service and paid AT&T data plan. Visit [onstar.com](http://onstar.com) for details and limitations. <sup>2</sup> Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible iPhone and data plan rates apply. <sup>3</sup> Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires the Android Auto app on Google Play and an Android compatible smartphone running Android 5.0 or higher. Data plan rates apply. <sup>4</sup> The system wirelessly charges one compatible mobile device. Some phones have built-in wireless charging technology and others require a special adaptor/back cover. To check for phone or other device compatibility, see [my.chevrolet.com/learn](http://my.chevrolet.com/learn) or consult your carrier.

## SEATING

COMPETITION SPORT | EXTRA  
SUPPORT FOR TRACK DRIVING

GT1 | OPTIMIZED FOR COMFORT AND SUPPORT

GT2 | NAPA LEATHER FOR ULTIMATE COMFORT

---

## THREE WAYS TO BECOME ONE WITH YOUR CORVETTE.

Becoming one with a car means you're properly situated behind the controls. Corvette offers three different seats for different driver preferences, all in a multitude of color combinations and contrasting color seat belts – and all with available thick contrasting stitching.

The GT1 seat in Mulan leather provides an intelligent balance between excellent support for enthusiastic driving and easier entry/egress for regular driving use.

The available GT2 seat in Napa leather blends the comfort of the GT1 seat with the appearance and carbon-fiber trim of the Competition Sport seat. Suede or two-tone leather inserts are available.

The available Competition Sport seat provides aggressive bolsters for track driving, with a performance textile in high-wear areas.

## CARGO SPACE

FRONT TRUNK

REAR TRUNK

The new Stingray is equipped with two trunks, one in the front and one in the rear behind the engine, for luggage, coolers, groceries and more. Both coupe and convertible offer the same 12.6 cubic feet of cargo area! The front trunk will accommodate a standard carry-on roller bag as well as a medium backpack. The rear trunk will carry up to two sets of golf clubs or the removable roof panel (coupe). This kind of versatility makes Stingray a real-world grand touring machine.

<sup>1</sup> Cargo and load capacity limited by weight and distribution.

—

## THE REWARDS OF A HIGHER EDUCATION.

### RON FELLOWS PERFORMANCE DRIVING SCHOOL.

—

The premier driving academy of Corvette is located at Spring Mountain Motor Resort and Country Club in Pahrump, Nevada. Ron Fellows, a charter member of Corvette Racing — and a multi-time driving champion and class winner in every major long-distance sports car race — established the curriculum here in October 2008. The school, available to 2020 Stingray owners<sup>1</sup>, will help you benefit from Fellows' precision-detailed regimen designed to help you fully enjoy and appreciate the capabilities of your Stingray. Learn more at [corvetteownersschool.com](http://corvetteownersschool.com).

### THE CONSUMMATE DELIVERY EXPERIENCE.

—

Take delivery of your Stingray in thoroughbred country, right from the floor of the National Corvette Museum in Bowling Green, Kentucky. Just specify Corvette Museum Delivery when ordering your Corvette. You'll also receive a one-year individual membership to the Museum and a personalized interior plaque with your name and VIN.

### PERSONALIZED INTERIOR PLAQUE.

—

Your eighth-generation Stingray is a sure collector's item. Make it even more special with an available Personalized Interior Plaque that features your name, your VIN and the Corvette crossed-flags logo.

<sup>1</sup> Only first retail purchasers of new and unused Corvette models are eligible. Does not include travel costs.

1 month of Chevrolet Connected Services<sup>5</sup> and 1 month of OnStar Safety & Security Plan coverage<sup>5</sup>

CHEVROLET

COMPLETE CARE

## NEW VEHICLE LIMITED WARRANTY

### 3-year/36,000-mile Bumper-to-Bumper Limited Warranty.

Chevrolet will warrant each 2020 Corvette from bumper to bumper for 3 years/36,000 miles (whichever comes first; see dealer for details), with no deductible, from the original in-service date of the vehicle, for warrantable repairs that are required as a result of defects due to materials and/or workmanship. Cosmetic corrosion resulting from defects is also covered under the Bumper-to-Bumper Limited Warranty. In addition, rust-through corrosion will be covered for 6 years/100,000 miles (whichever comes first). See dealer for details.

### 5-year/60,000-mile transferable Powertrain Limited

Warranty. Every 2020 Corvette comes with a 5-year/60,000-mile (whichever comes first) transferable Powertrain Limited Warranty. 24/7 Roadside Assistance and Courtesy Transportation are also offered for the duration of the Powertrain Limited Warranty. Please see your Chevrolet dealer for details.

## IMPORTANT INFORMATION

**Chevrolet Owner Center (my.chevrolet.com).** Everything you need to know. Anything you need to do. Your Chevrolet Owner Center makes it easy. Create your account today to get the most out of your new vehicle. Get special alerts and offers, schedule service, review your maintenance schedule, and view how-to videos specifically for your vehicle. All online, anytime. Visit the Owner Center today to register or take a tour.

**Engines.** Chevrolet products are equipped with engines produced by GM Global Propulsion Systems or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

**Assembly.** Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

**Chevrolet Connected Services and OnStar.** Connected vehicle services vary by vehicle model and require an active service plan, working vehicle electrical system (including battery), cell reception and GPS signal to function properly. Visit onstar.com for details and limitations.

**A note on child safety.** Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner's Manual and the child safety seat instructions for more safety information.

**Important words about this catalog.** We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet dealer for complete details. Chevrolet reserves the right to lengthen or

shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Luxury Sports Car segment and latest available competitive information. Excludes other GM vehicles.

**Tires.** Corvette is equipped with run-flat Michelin® Pilot® tires that eliminate the need for a spare. The tire design enables safe function during and after loss of pressure for some distance at a moderate speed. The shorter the distance that you drive with loss of pressure, the better the chance that the tire can be repaired. As soon as possible, contact Roadside Assistance for the nearest authorized GM or run-flat tire servicing facility and have the tire inspected. See your Owner's Manual. Corvette has low-profile tires that tend to wear faster and are more susceptible to damage from road hazards or curb impact than standard profile tires. This type of damage is not covered by the GM New Vehicle Limited Warranty.

**Fleet orders.** Some standard content may be deleted on fleet orders. See dealer for details.

**Chevrolet ownership experience.** Chevrolet is committed to enhancing the vehicle shopping and ownership experience through a wide array of programs. Visit chevrolet.com to build and price, find a vehicle, request a quote, compare vehicles, find financial tools or track your vehicle order. You'll also find information about 24-hour Roadside Assistance, Courtesy Transportation, Customer Assistance, GM Mobility, safety and current incentives.

**Chevrolet.com/safety.** Chevrolet is committed to keeping you and your family safe – from the start of your journey to your destination. That's why every Chevrolet is designed with a comprehensive list of safety and security features to help give you peace of mind.

**GMmobility.com (1-800-323-9935).** GM Mobility™ offers financial assistance for eligible adaptive equipment to make automotive travel easier for persons with disabilities or special transportation needs. To learn more about special GM Mobility offers, visit gmmobility.com.

**The BuyPower Card.** The Chevrolet BuyPower Card – Every purchase you make with the BuyPower Card from Capital One\* helps you earn toward an eligible new Chevrolet, Buick, GMC or Cadillac vehicle. There's no limit on the amount you can earn or redeem, and your Earnings don't expire. Visit chevroletbypowercard.com/catalogs.

\* Capital One, N.A. is the issuer of the BuyPower Card. General Motors ("GM") is responsible for the operation and administration of the Earnings program.

“ ALL CORVETTES  
ARE PERFORMANCE  
CARS.  
THE DIFFERENCE  
IS DEGREE. ”

— ZORA ARKUS-DUNTOV

Racing has always played a vital role in the development of the production Corvette. The technical transfer between racing and production goes back to the early years of Corvette under Zora Arkus-Duntov. The current Corvette Racing program began in 1999, and the team has won its class at Le Mans eight times since.

A new chapter begins with Zora's mid-engine dream now a reality as the C8.R takes on the world at venues like Le Mans, Sebring and Daytona. Its new war cry signals that the spirit of Zora is alive and well in all things Corvette.
