

PONTIAC
2007

STARSTRUCK.

Every line an outpouring of roadster essence. Every detail focused on performance.

An eager, responsive engine. Short-throw shifts. Balanced rear-wheel drive. With its 18-inch aluminum wheels and wide, athletic stance—a wider track than a Porsche Boxster*—Solstice is designed to run, stop and turn as effortlessly as it turns heads.

And now, for those who lust after power, for the ultimate in life experiences, we've made a GXP version. A primal-scream of a turbo built to push to extremes—260hp and sub-5.5 zero-60. Quick enough to travel among the stars.

*Competitive comparisons are based on latest information available at time of printing.

Solstice shown in Mysterious.
Some photos in this catalog contain optional equipment.

GO WITH THE FLOW.

Solstice employs an advanced manufacturing process to create both its provocative exterior forms and its light but rigid internal structure. Hydroforming uses water at extreme pressure to give shape and strength to steel. It is used to create the vehicle's large and beautifully shaped body panels, including the one-piece clamshell hood and highly sculpted deck lid. Those distinctive twin aero fairings complete an integrated design that makes Solstice a rare soft-top convertible that looks as good with the top up as down.

Hydroforming eliminates welds that add needless weight while imposing precision. A key result is the high strength-to-weight ratio required of a light but powerful sports car. It also enables the application of a racing-derived front and rear suspension: double-wishbones of forged aluminum, with coil-over Bilstein monotube shocks. Hydraulic power rack-and-pinion steering and large disc brakes provide performance-level effectiveness with positive feedback. In other words, the expectations raised by Solstice's provocative exterior are fully realized by what's under the skin.

Solstice interior shown in Ebony.

SOME FANTASIES NEED ONLY ONE X.

In addition to a 47% boost in horsepower and 56% boost in torque, Solstice GXP adds sport-tuned suspension, four-wheel ABS, a limited-slip differential, W-speed rated performance tires and

StabiliTrak—one of the world's most advanced vehicle stability enhancement systems—with traction control. Befitting an all-out performance vehicle, GXP's StabiliTrak system incorporates a "competition mode" feature that allows the driver increased control of the application of power to the rear wheels, essential when negotiating a race circuit.

Even GXP's distinctive exterior features are oriented toward extreme performance. The front fascia houses cooling vents designed to guide air past the front brakes, also helpful at a race circuit.

Mounted in the rear fascia are the turbo's high-polished dual exhaust outlets, source of the vehicle's pleasingly throaty growl. Special GXP exterior badging complete this very dramatic picture.

INTERNAL AFFAIRS.

Solstice’s sport bucket seats feature enhanced lateral support for performance driving, yet they’re comfortable for long trips. Manual fore-aft adjustment (with recliner) is standard. New for ‘07 is a driver’s side power seat height adjuster, enhancing both comfort and your engagement with the vehicle.

Throughout, the interior is beautifully detailed, centering on motorcycle-style gauges with oversized analog readouts that telegraph information in an instant. With the GXP model comes special badging on the seats, instrument panel and door sill plates.

Which brings us to the Solstice audio experience. It starts with an electronically tuned AM/FM stereo with CD player that incorporates highly intuitive control and display features and a jack that allows you to plug your iPod®/MP3 player right into the radio. For the ultimate in listening, top up or down, the Monsoon® premium speaker option pumps 225 watts of power into seven speakers, including a subwoofer for thumping concert-style bass. XM Satellite Radio, available with Solstice’s two premium audio systems, adds digital-quality sound and immense programming variety. See page 108 for more details. OnStar, described on page 109, is available on every Solstice and Solstice GXP.

GXP interior shown in Ebony with Red accent stitching.

POISED TO STRIKE.

Solstice's twin-cam four-valve-per-cylinder 2.4L ECOTEC produces 177hp and 166lb-ft of torque.

Even better is the way variable valve timing shapes both output curves to enhance the entire performance spectrum. More than 90% of peak torque is available from 2200 to 6200 rpm, and the 2.4L runs strong all the way up to its 7000-rpm redline.

GXP's 2.0L Turbo ECOTEC DOHC spools out 260hp and 260lb-ft of torque. The 2.0L combines the boost of a turbocharger with an intercooler to help pack the cylinders with oxygen. Then direct fuel injection atomizes gasoline directly into the combustion chamber, creating a more complete burn of the air/fuel mixture. Zero-to-60 takes less than 5.5, quicker than a Porsche Boxster.

Both models feature a 5-speed manual with short, precise shifts that make excellent use of the wide power bands. But give serious consideration to the available electronically controlled 5-speed automatic. An indication of its level of refinement is that GXP turns in the same sub-5.5 zero-to-60 with either transmission.

*Excludes other GM vehicles.

TONNEAU COVER Helps protect the cockpit from dust, UV exposure and light moisture. In a classic roadster touch, you can drive with the passenger side closed and driver's side open.

WINDSCREEN Constructed of black aluminum with see-through black mesh, it installs behind the seatback and minimizes air turbulence in the passenger compartment.

LUGGAGE RACK Increase your cargo options with this stylish luggage rack designed to complement your Solstice. Available in silver or black finish. (Available 4th quarter 2006.)

CAT-BACK EXHAUST* Adds an aggressive growl to the exhaust note; T-304 stainless steel for long life. Includes semi-polished muffler and choice of fully polished exhaust tips. Not available for GXP.

*When properly installed, this system will comply with local and state noise ordinances limiting noise from modified exhaust systems to 95 dbA. See your dealer for more details.

VEHICLE COVER Convenient full-vehicle cover. Helps keep out dirt, dust and abrasive particles while helping to protect the finish of your Solstice by letting moisture evaporate.

ALL-WEATHER FLOOR MATS Exact fit to footwells. Provide pleasing appearance while helping to protect the interior from mud, snow and debris. Each bears the Solstice logo.

ACCESSORIES? OR ADDICTIONS?

Add just the right custom touches to Solstice with available accessories created specifically to match its distinctive exterior and interior. In addition to the items shown at left, other Solstice accessories include a front-end cover, custom-molded body-color splash guards, sport-styled exhaust tips with a choice of fully rolled or half-rolled lip and the 18-inch chromed aluminum wheels shown below on Solstice GXP. Solstice accessories can be obtained and installed at your local Pontiac dealership and are covered under the vehicle's GM New-Vehicle Limited Warranty.

Solstice GXP shown in Mysterious with Darkside top and with 18-inch accessory chromed aluminum wheels.
