

# SUZUKI 2006 dune

\*\*\*\* Introducing Dune, one of four Suzuki LIVE Concept Vehicles

Dune's towing capacity tops 3,000 lbs. That's four dirt bikes, two QuadRacers. Or 20 sorority girls.

With 26 inches of ground clearance, clearing stumps and rocks is as easy as falling off a log.

Flared fenders help keep dirt and rocks on the ground where they belong.

With built-in GPS and NAV systems, you'll only get lost when you want to.

A rack that bends to receive your luggage? How thoughtful. (And smart.)

Suspension need a tweak? Tire pressure low? Repairs are easy with the "mobile garage" work station.

## Suzuki LIVE

We're out to become the car company that makes vehicles for people who really go for it—you know, the kind of people who get out on the dirt bike before breakfast, go bungee jumping on their lunch hour and board downhill by twilight. So before we designed the Dune, we picked the brains of life enthusiasts, adventurers and thrill seekers. Talking to people like you was the only way to figure out how to build the vehicles you want—cars and SUVs that aren't just a means of getting from point A to point B, but are as integral as the leash on your surfboard, the chain on your dirt bike or the boots in your skis. You had some pretty good ideas. They resulted in the Suzuki Sea, the Blizzard, the Wave and the Dune, the Suzuki LIFE VEHICLE Concept Series (LIVE). Looking to get more out of life? We're giving you the green light.
